hiddentokens

PRESS KIT
Updated 29 October 2026

AI does the work. It never knows who.

Hidden Tokens replaces the names, identifiers and amounts in a file with codes on the user's own computer, before Claude, ChatGPT or any other AI reads it, and puts the real values back into the result, on the same computer. The key never leaves the machine.

THREE NUMBERS

14/15

legal AI tools in the French bar's 2025 reading grid name a US company among those hosting the language model.

CNB AI working group, Grille de lecture, June 2025

9/15

of the same tools declare nothing on pseudonymisation or anonymisation, which the bar's April 2026 ethics guide recommends.

CNB, June 2025 and April 2026

77.5%

of 2,523 French and Moroccan direct identifiers caught by Presidio's defaults; Hidden Tokens 2.28.0: 100%. Synthetic benchmark run by Hidden Tokens.

HT-Bench 0.2.0, test split, 25 Oct. 2026

ABOUT

Hidden Tokens is a desktop app for lawyers, accountants, HR teams, banks, insurers, telecom operators and healthcare providers who want to use generative AI without handing over their clients' identities. It codes a whole case file on the user's computer — the same client gets the same code in every document — so the AI works on codes such as NOM-001. The result comes back in clear, in Word or Excel. Nothing is sent to Hidden Tokens.

STORY ANGLES

- **The legal AI market fails its own regulator's grid** on hosting and pseudonymisation.
- **Banning AI doesn't work; pseudonymising does** — with proof a DPO can check.
- **Generic detectors miss local identifiers** such as Moroccan bank accounts (5.5% caught by Presidio's defaults).
- **Proof, not promises:** a seal clients verify in a browser, a monthly signed ledger for the GDPR record.

LIMITS WE STATE OURSELVES

HT-Bench is synthetic and run by us: addresses, dates of birth and cheque numbers are still missed at times. Text pasted into an AI without Hidden Tokens is not protected. The Windows installer is not yet signed.

KEY FACTS

Platforms	Mac and Windows desktop app, Claude Desktop connector, Chrome and Edge extension
Works with	Claude, ChatGPT, Gemini, Copilot, Le Chat (Mistral), Perplexity, DeepSeek
Industry packs	Legal, accounting, HR and payroll, banking and insurance, healthcare, telecom
Proof	"What Claude saw" log, signed proof pages, client seal, coverage report, monthly signed Ledger
Pricing	Solo €390 / year · Firm €290 / seat / year · Organisation from €190 / seat / year (excl. VAT)
Trial	14 days, no account, no card
Version	App 0.15.0 (29 Oct. 2026); v1 planned for January 2027
